# The smile you deserve....

**DentMents** introduces an exciting new improved quality aligner through its unique process. Our mission is to deliver high quality, affordable, clear orthodontic aligner solution to the global market.

**DentMents** aligner provides a hygienic, convenient and clear solution to the correction of malocclusion without having to wear brackets and wires. Our staff members have over seven years of experience in the field of clear orthodontics. **DentMents** has completed a number of successful clinical trial cases before starting its commercial cases and has proven to be equally

successful in correction of a wider range of malocclusion.

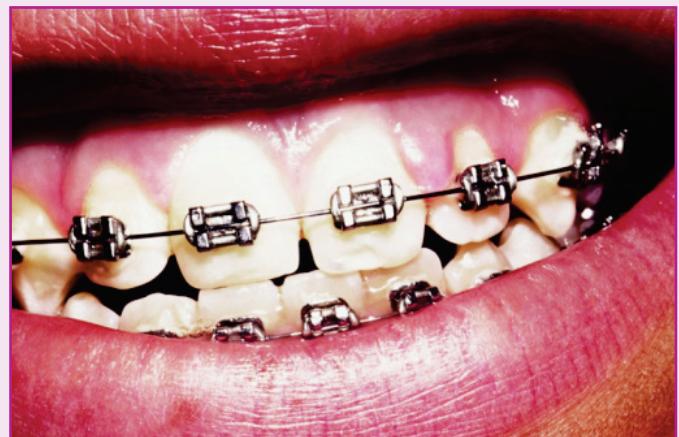

## DentMents Aligner and why is it is new?

- **DentMents** aligners are removable medical grade plastic appliances which patients wears instead of brackets and wires to correct malocclusion.
- A clear change to the concept of adult orthodontic treatment without using conventional methods of wires and brackets
- Adults wouldn't have asked for a better choice to correct those W4 malocclusions without having to think about the social inhibitions.

- Predictable result visualization even before the treatment begins.
- Comfort to keep living a normal routine, without even modifying the eating habits.
- Hygienic choice for the correction of malocclusion, since it is clear and smooth all round, this makes it easier to maintain oral hygiene and its removable feature makes it the best hygienic choice.
- You are in control of treatment plan at every step of the way and can make suggestions for efficient flow of treatment to achieve desirable results.
